

Crochet Travel Tissue Holder

A note about travel tissue packs:

Please make your holder to accommodate the typical size of pocket tissues. **4.25 inches x 2.25 inches x 1 inch thick and with a center hole.**

Instructions:

- Start with a crocheted rectangle of approximately 7 inches x 5 inches. You can do your own thing! (Here's what I did though: #4 yarn, 4.5mm hook. Ch 18 with turning chains. 18 HDC per row with turning chains. 17 rows.)

- Either add one more row to one short side or add an embellishment row. (I did a row of berry stitch.) Your rectangle will end at 5 inches x 7.25 inches.

- Tie off and weave in ends.
- Fold in short ends with two rows of overlap in the center with the embellishment row on the outside. You can pin it if you need.

- Crochet or whip stitch the long sides together so that they are closed up and the short ends are overlapped and open in the center.
- Tie off and weave in your ends.
